Pre-workshop Details

12:30–13:45 From search to insight: Scopus with AI in action — Sergio Vidal (presenter to be confirmed)

Session Title: “Responsible AI in scientific publishing: research integrity, principles and policies at Elsevier”

Date and time to be confirmed, 60 minutes, [online via link / at location]

1. 1. Why this matters (5 minutes)
    - How researchers use AI today and the ideas that guide Elsevier’s approach.
2. Research integrity at Elsevier (12 minutes)
    - Selectivity at scale and integrity checks at every stage of publication
    - How human experts and technology work together, including Check Integrity
    - How we correct the scientific record when standards fall short
3. Responsible AI Principles (6 minutes)
    - Our five principles and how we put them into practice in the publication process.
4. AI policies for every role (20 minutes)
    - Authors: what AI may and may not do, accountability and disclosure
    - Figures and images: what is permitted for each type of image
    - Reviewers and editors: confidentiality and human judgment
    - Private AI tools, and how journal and book policies differ
    - Six everyday scenarios: is it allowed?
5. Questions (15 minutes)
